Professional Summary

Full-Stack Engineer with **4+ years of professional experience** in software development, AI engineering, and technical education. Experienced in building end-to-end web applications using **React, Node.js, REST APIs, SQL, Docker, Jenkins, and CI/CD**, with hands-on experience developing projects such as a **Cinema Booking System, Learning Management System (LMS), E-Commerce Platform, API integrations, and Data Analysis solutions**. Currently working as an **AI Advanced Trainer**, specializing in **Reinforcement Learning (RL), Reinforcement Learning from Human Feedback (RLHF), and Supervised Fine-Tuning (SFT)** to improve the performance, accuracy, and scalability of large AI models. Proficient in **Python, JavaScript, Machine Learning, SQL, and AI engineering**, with a passion for building scalable, AI-powered applications by combining modern full-stack development practices with intelligent solutions across frontend, backend, and DevOps environments.

PROFESSIONAL EXPERIENCE

Korean ASEAN Digital Academy (KADA)

Jun 2026 – Present

Full-Stack Engineering Trainee

Built and deployed a full-stack **Cinema Booking System** using **React, Node.js, Express.js, MySQL, Docker, Jenkins, and REST APIs**, delivering an end-to-end movie ticket reservation platform.

Key Contributions

- Developed a responsive multi-page web application using **React** and **Node.js**, implementing user authentication (Sign Up/Sign In), movie browsing, seat selection, and ticket booking workflows for **10+ core application features**.
- Designed and implemented **15+ REST API endpoints** with **Express.js** and **MySQL** to manage user accounts, movies, schedules, bookings, and administrative operations while ensuring secure client-server communication.
- Built a role-based **Admin Dashboard** enabling CRUD operations for movies, showtimes, users, and bookings, reducing manual data management through centralized administration.
- Containerized the application using **Docker** and automated build and deployment pipelines with **Jenkins**, improving deployment consistency and reducing manual deployment effort.
- Collaborated in an Agile development environment using **Git/GitHub**, participating in code reviews, API integration, debugging, and end-to-end testing to deliver a production-ready application.

Key Achievements

- Delivered a complete **end-to-end full-stack application** integrating frontend, backend, database, authentication, and deployment within the academy project timeline.
- Successfully integrated **React, Node.js, MySQL, REST APIs, Docker, and Jenkins** into a single CI/CD-enabled workflow, demonstrating full software development lifecycle (SDLC) practices.

- Achieved **95%+ successful API test execution** across authentication, booking, and admin modules while maintaining stable application functionality during integration testing.

Skool of Code | Remote

Coding Educator

Aug 2025 – Present

Key Contributions

- Delivered live coding instruction to students aged **6–18** in **Python, JavaScript, HTML, CSS, React, and web development**, using project-based learning to build practical programming skills.
- Mentored students in developing real-world applications, including interactive websites, games, and beginner full-stack projects, strengthening their understanding of software development principles.
- Conducted technical consultation and trial sessions for prospective students, maintaining an average **90% conversion rate** from demo classes to paid enrollments.
- Designed personalized learning paths and coding challenges based on individual skill levels, improving student engagement and learning outcomes.
- Collaborated with academic and operations teams to enhance curriculum delivery, monitor student progress, and provide constructive technical feedback.

Key Achievements

- Maintained approximately **90% demo-to-enrollment conversion**, consistently exceeding team targets.
- Successfully mentored **100+ students** across beginner to intermediate programming topics.
- Received consistently positive student and parent feedback for delivering engaging, project-based coding instruction and technical mentorship.

Invisible Technologies | San Francisco, CA (Remote)

AI Advanced Trainer

Feb 2025 – Present

Key Contributions

- Trained and evaluated **Large Language Models (LLMs)** using **Reinforcement Learning (RL), Reinforcement Learning from Human Feedback (RLHF), and Supervised Fine-Tuning (SFT)** across diverse reasoning, coding, and instruction-following tasks to improve model quality.
- Optimized AI model outputs by identifying failure patterns, refining training data, and delivering high-quality annotations that consistently exceeded internal quality and productivity benchmarks.
- Collaborated with cross-functional AI teams to improve evaluation methodologies, prompt design, and training workflows, contributing to scalable AI model development.
- Performed quality assurance on complex AI responses, ensuring factual accuracy, logical reasoning, code correctness, and alignment with project requirements.
- Contributed to continuous improvements in AI training processes by documenting best practices and supporting the development of scalable evaluation standards.

Key Achievements

- Consistently exceeded performance and quality KPIs while maintaining high annotation accuracy across AI training projects.

- Contributed to improving LLM performance through RLHF and SFT workflows used in production-scale AI model development.
 - Recognized for delivering reliable, high-quality work on complex reasoning and coding evaluation tasks.
-

Coding Educator

BrightChamps | Remote

Nov 2021 – April 2025

Key Contributions

- Delivered live coding instruction to **100+ students** aged **6–18** in **Python, C++, JavaScript, web development, game development, and introductory AI**, adapting lessons to different learning levels.
- Guided students through hands-on software development projects, strengthening programming fundamentals, debugging skills, computational thinking, and problem-solving abilities.
- Conducted personalized product demonstrations and technical consultations for prospective students, achieving an average **90% conversion rate** from demo sessions to paid enrollments.
- Collaborated with international students from **8+ countries**, delivering technical instruction in English while adapting teaching approaches to diverse learning needs.
- Created engaging coding exercises, project-based learning materials, and technical content to improve student engagement and learning outcomes.

Key Achievements

- Recognized as a **Top Teacher** within the first **2 months** based on student performance and satisfaction.
- Maintained one of the organization's highest demo-to-enrollment conversion rates at approximately **90%**.
- Generated **100+ qualified student referrals** through educational content and social media outreach, contributing to business growth.

PROJECTS

Cinema Booking System

Tech Stack: React.js | Node.js | Express.js | MySQL | REST API | Docker | Jenkins | Git

Project Overview: Developed a full-stack web application enabling users to browse movies, reserve seats, and manage bookings through a responsive and secure platform.

Key Contributions

- Built a full-stack cinema booking application using **React, Node.js, Express.js, and MySQL**, implementing user authentication, movie browsing, seat reservation, and online ticket booking across **10+ application modules**.

- Developed **15+ REST API endpoints** to manage authentication, movies, schedules, bookings, and user profiles, enabling seamless frontend-backend communication.
- Designed a role-based **Admin Dashboard** to manage movies, showtimes, users, and booking records through complete CRUD functionality.
- Containerized the application with **Docker** and automated build and deployment pipelines using **Jenkins**, streamlining development and deployment workflows.
- Collaborated using **Git/GitHub** in an Agile environment, performing API integration, debugging, and end-to-end testing to improve application stability.

Key Achievements

- Delivered a complete end-to-end booking platform integrating frontend, backend, database, and deployment pipeline.
 - Reduced deployment time by approximately **70%** through Docker containerization and Jenkins CI/CD automation.
 - Achieved **95%+ successful API integration and testing** across authentication, booking, and administration modules.
-

Coffee Shop Business Analytics Dashboard

Tech Stack: Python | SQL | Power BI | Excel

Project Overview: Developed a business intelligence solution to analyze sales performance, customer behavior, and operational metrics, supporting data-driven business decisions.

Key Contributions

- Cleaned, transformed, and analyzed **50,000+ sales transaction records** using **SQL and Python** to identify revenue trends, customer purchasing behavior, and product performance.
- Built **interactive Power BI dashboards** visualizing revenue, profit, customer segmentation, sales trends, and top-performing products through **20+ business KPIs**.
- Performed customer behavior analysis including purchase frequency, retention trends, and product affinity to uncover business growth opportunities.
- Structured executive-level reports with actionable insights and strategic recommendations for pricing, inventory optimization, and marketing campaigns.
- Automated data preparation and reporting workflows, reducing manual reporting effort and improving reporting consistency.

Key Achievements

- Identified high-performing product categories contributing approximately **35% of total revenue**.
 - Produced executive dashboards reducing reporting preparation time by **60%**.
 - Delivered data-driven business recommendations supporting sales growth, customer retention, and inventory optimization.
-

AI-Powered Scholarship Matching Platform

Tech Stack: React.js | Node.js | Express.js | Python | OpenAI API | MySQL | REST API

Project Overview: Developed an AI-powered full-stack platform that matches scholarship opportunities with candidate profiles while providing AI-assisted essay writing, recommendations, and personalized tutoring.

Key Contributions

- Built a full-stack scholarship platform using **React, Node.js, Express.js, MySQL, and REST APIs**, enabling profile management, scholarship discovery, and application tracking.
- Developed an intelligent **scholarship recommendation engine** that matches candidate profiles with scholarship requirements based on academic background, skills, and eligibility criteria.
- Integrated AI-powered features including **essay generation, application recommendations, and AI tutoring** to guide users throughout the scholarship application process.
- Designed secure authentication, user dashboards, and administrative modules to manage scholarship listings and applicant information.
- Collaborated on system architecture, API integration, testing, and deployment to deliver an end-to-end AI-enabled web application.

Key Achievements

- Delivered an integrated platform combining full-stack development with AI-assisted recommendation and content generation.
- Improved scholarship discovery efficiency by automatically matching candidates with relevant opportunities based on profile data.
- Demonstrated practical implementation of AI APIs, REST architecture, authentication, and modern full-stack engineering practices within a scalable web application.

SKILLS

Programming Languages: Python, JavaScript, TypeScript, SQL, C++, HTML5, CSS3

Frontend Development: React.js, HTML5, CSS3, JavaScript (ES6+), Responsive Web Design

Backend Development: Node.js, Express.js, REST APIs, Authentication (JWT), CRUD Operations

Databases: MySQL, PostgreSQL, SQL Database Design

DevOps & Tools: Docker, Jenkins, Git, GitHub, CI/CD, API Testing (Postman)

AI & Machine Learning: Python, Machine Learning, Large Language Models (LLMs), Prompt Engineering, Reinforcement Learning (RL), Reinforcement Learning from Human Feedback (RLHF), Supervised Fine-Tuning (SFT), Data Analysis

Data & Analytics: SQL, Data Cleaning, Data Modeling, Data Visualization, Power BI, Business Intelligence, Executive Reporting

Software Engineering: Full-Stack Development, Software Development Lifecycle (SDLC), Agile Methodology, Debugging, Object-Oriented Programming (OOP)

Additional Skills: Technical Mentoring, Programming Instruction, Technical Writing, Content Creation, Web Development, Game Development

Languages: Indonesian (Native), English (Professional Working Proficiency), Arabic (Written)

EDUCATION

Bandung Institute of Technology (Institut Teknologi Bandung)

Bachelor of Science in Chemistry

2016 – 2020

Certifications

Full-Stack Engineering — Korean ASEAN Digital Academy (KADA)

AI Engineering — Qareer Generator
